

## Professional Backup with Data Off-Site Storage, finally easy!

### RDX Removable Media from Overland-Tandberg & P5 Backup from Archiware

Many companies only recognize how valuable their data is once they've lost it. More than 80 % of companies that suffer a major data loss file for bankruptcy within two years, based on a study in the US.

Setting up an automatic backup is easy. **Tandberg Data RDX + P5 Backup** software from Archiware provides automatic backup, including the off-site storage of data for professional security. Configuration and restore from the browser interface allows flexibility and an overview of the secured data. Professional backup with off-site data storage has never been so easy.

#### Backup with Off-Site Storage

##### 1 Server

The combination of **Overland-Tandberg's RDX** and **P5 Backup** provides automatic Workstation and Server Backup. High security requirements are simple and inexpensive to implement, with rotation of media to achieve maximum security for corporate data. Alternating Backup provides a backup even in the case of omitting a media change.

Three media – in use, in transit, and stored – guarantee that your data is never at risk of being in the same place. The result: quick, automated backup combined with off-site data storage to fulfill the requirements of professional data safety.

#### Larger Backup with Data Off-Site Storage

##### 4 Server

Larger amounts of data can be protected automatically with the RDX QuikStation, which manages multiple media. P5 Backup can then use up to eight cartridges for backup and restore. Storing data off-site provides maximum security. Previous file versions and backups are also available for users to restore, if necessary. Interrupted backups are completed automatically. Alternating Backup offers a backup, even if a medium

change is accidentally omitted. Three mediums – in use, in transit, and stored – guarantee that your data is never at risk of being in the same place. The **RDX QuikStation + P5 Backup** work together to secure mid-sized environments automatically and conveniently.
